

CHINMAY SHASTRY

AI Engineer

(Finance, Python, LLMs, RAG)

E-mail: chinmay.v.shastry@gmail.com | +91 63605 84277 | Bengaluru, India

LinkedIn: [ChinmayShastry](#) | GitHub: [ChinmayShastry](#)

PROFESSIONAL SUMMARY

Analytically driven AI Engineer with a robust foundation in financial markets, business analysis, and client advisory, bridging the gap between domain expertise and applied AI. Skilled in framing complex real-world challenges into structured, data-driven solutions, with a portfolio spanning hybrid RAG systems, agentic workflows, and deep learning models. Currently deepening financial domain proficiency through IIM Bangalore's Fintech Programme to drive business-centric innovation. Committed to applying technical capability and financial intelligence to high-impact AI Engineering and Data Science roles.

TECHNICAL SKILLS

Finance Domain	Equity markets, derivatives (Futures & Options), portfolio management, business analysis, fundamental & technical analysis, financial accounting, corporate finance, quantitative analysis
Languages	Python, SQL
GenAI & LLM Tools	LangChain, LlamaIndex, OpenAI API, HuggingFace, Ollama; Vector Databases (FAISS, ChromaDB); Retrieval & Reranking (BM25, CrossEncoder); Agentic Workflows, Prompt Engineering, Embeddings.
Machine Learning/ Deep Learning	scikit-learn, TensorFlow, Keras, XGBoost, Random Forest, CNN, Transfer Learning, PyTorch
Data & Analysis	Pandas, NumPy, SciPy, Matplotlib, Seaborn, Time Series, Feature Engineering, Cohort Analysis
Visualization & BI	Power BI, Tableau
Deployment & Tools	Streamlit, Gradio, HuggingFace Spaces, Git, GitHub, Docker (Basic), AWS EC2 / SageMaker (Basic)
Soft Skills	Adaptability, Analytical reasoning, Problem-Solving, Communication, Continuous Learning

EXPERIENCE

AI Engineer Intern	Dec 2025 – May 2026
Rubix AI Solutions	Bengaluru, India
- Completed a project-based AI engineering internship, designing and deploying end-to-end ML pipelines across computer vision and NLP — including Pneumonia Detection CNN, Traffic Sign Recognition, and Indian Sign Language Recognition. - Executed end-to-end ML pipelines covering data preprocessing, feature engineering, model training, and evaluation using Python, Scikit-learn, and TensorFlow. - Delivered technical documentation covering performance metrics, business impact, and deployment considerations; collaborated across teams on real-world AI solutions.	
Portfolio Manager & Financial Advisor	2019 – 2024
Independent — Freelance	Bengaluru, India
- Managed equity and derivatives portfolios for 50+ clients, applying fundamental and technical analysis, corporate finance valuation, and options strategy to optimize risk-adjusted returns. - Educated clients on market mechanics and advanced options strategies, translating complex financial information into clear, outcome-oriented recommendations.	

AI / ML PROJECTS

AI Finance Research Assistant — Finance Research

[Github](#) · [Streamlit Live](#)

- Developed an AI-powered Financial Research Assistant (Python/Streamlit) for analyzing Nifty 250 stocks and commodities.
- Integrated real-time data pipelines (Yahoo Finance, NewsAPI) and GPT-4o-mini LLM modules to automate market intelligence, advanced sentiment analysis, and long-term research reporting.
- Designed interactive Plotly dashboards for visualizing price trends and AI-generated research summaries, improving research efficiency and decision-making support.

DocChat AI — Hybrid RAG Document Intelligence

[Github](#) · [Streamlit Live](#) · [Gradio Live](#)

- Engineered a hybrid RAG system (BM25 + semantic search + CrossEncoder reranking) for accurate, fast querying across large document sets, improving RAGAS context precision from ~78% to 100%.
- Built with multi-document support, semantic chunking, and streaming responses; applicable to Asset Management (AM) workflows for investment memo retrieval, Annual Return QA, Audit Report QA, Law & Regulations QA, policy document QA, analyst research search.

Enterprise RAG System — Production Deployment

- Built a modular, production-ready RAG pipeline with RBAC-enforced document access, rotating query logger, LRU caching, and Tenacity retry logic — live on Streamlit Cloud with a public GitHub repository.
- RBAC design mirrors data governance requirements in asset management environments; feedback dashboard enables continuous monitoring and improvement.

LLM-Powered Resume Analyzer — Agentic AI Tool

[Github](#) · [Streamlit Live](#)

- Architected an agentic resume evaluation system with autonomous multi-step reasoning (parse → extract → analyse → output) to generate structured, role-specific skill-gap analysis and candidate recommendations.
- Built an interactive Streamlit dashboard for real-time resume scoring and feedback visualisation; deployed live on Streamlit Cloud.

Computer Vision & Deep Learning Portfolio

- Developed a custom 4-block CNN for Pneumonia Detection using VGG16/ResNet50 transfer learning on Kaggle datasets; optimized for clinical sensitivity and interpretability via Grad-CAM visualization.
- Architected an Indian Sign Language Recognition system classifying 24 hand gestures with 99.87% accuracy, leveraging a 4,972-image custom CNN architecture.
- Engineered a multi-class Traffic Sign Classifier (43 categories) using MobileNetV2 and ResNet50 with stratified data pipelines to ensure robust model generalization.

Predictive Modeling & Quantitative Analysis

- Designed a business-centric Telecom Churn Prediction model using XGBoost and SHAP on a 243K-customer dataset to quantify cost-benefit trade-offs and drive retention strategy.
- Built a custom OLS-estimated SARIMA model (ADF/ACF/PACF analysis) for recursive temperature forecasting; framework is directly applicable to quantitative financial time series and volatility modeling.

EDUCATION

IIMBx Fintech Programme — IIM Bangalore

In Progress, Expected - Sep 2026

Bachelor of Commerce (B.Com) — 81.43% — Gulbarga University

Feb 2025

CERTIFICATIONS

AI Engineer Professional Program (Offline) | DataMites

2025

AI Engineer Certification | NASSCOM

2026

AI Engineer Certification | IABAC
